K5 Tech-Talk
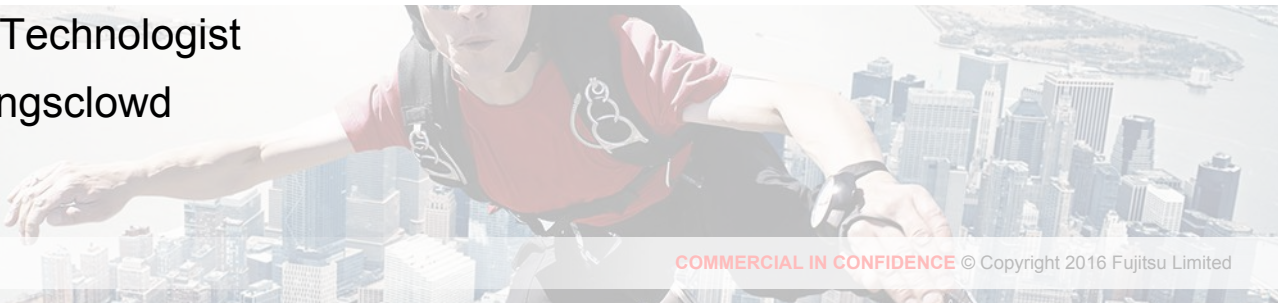

K5 OpenStack API meets Angular 2

Graham Land

K5 OpenStack Technologist

Twitter: @allthingsclowd

# Tech-Talk Agenda

- ## K5 API Authentication

  - Using the OpenStack Keystone v3 API endpoint to authenticate with Fujitsu's K5 IaaS platform

  - CORS on K5

- ## Why?

  - IaC – Infrastructure as Code, CI/CD Pipeline Development

  - Once you can authenticate it's the gateway to application development on K5

  - Angular 2 is the up and coming front-end browser framework - great for your career
